

(17) Multi-State Permits

(A) The Missouri Department of Transportation is authorized to participate in the Multi-State Permit Program. This program provides a single, routine, uniform mechanism for processing single-trip permits for oversize and overweight vehicle combinations at the option of the department. Such a permit allows a motor carrier to travel through several states with one (1) point of contact and one (1) permit document.

(B) The same rules, regulations, and fees apply to Multi-State Permits as any other single trip permit, except the permit will be valid for a period of ten (10) calendar days. Also, these permits can only be obtained to transport loads within current envelope dimensions and weights.
